

## **Wil Meijer-Kal**

married and mother of three adult children.

Why does a teacher in physical education decide to start a study in Classical Homeopathy in Amersfoort in 1991?

Three little children to attend to, a job in school and at that time working two evenings per week with pregnant women?

The reason for this lifechanging decision was that I saw what classical homeopathy can do for people.

My family has always benefit from the homeopathic medicines administered to them.

Now, 19 years later, I practise homeopathy in Bennebroek for over 13 years already. I have never had any regret of my choice to become a classical homeopath.

Through seminars and selfstudy I keep exploring and learning more about this wonderful healing method.

Classical homeopathy can help people with a wide variety of health issues.

There is no focus on just that headache, or just the eczema. We want to get to know the whole person, we want to cure the whole person.

To learn more about:

- what can be done for pregnant women, during labour and after giving birth;
- CEASE-therapy, especially for the treatment of autism;
- if you have never had any experience with classical homeopathy I advice you to look at the video. Take a little hour to get acquainted with the filosophy and workingmethod.

just click on the links on the website.

**“Do those things in life your heart goes out to.  
Do them with passion, It’s the first step to heal yourself”**
